Verbal Reasoning

Language Comprehension

WORD RECOGNITION

- Explicit, research-based foundational skills instruction
- K-5 decodable books and word study passages
- Phonics Skill Packs for student practice and application
- Motivating, self-paced, systematic independent skill practice
- Assessments to evaluate all critical foundational skills

LANGUAGE COMPREHENSION

- Research-aligned reading comprehension instruction
- Graphic organizers and tools to support reading comprehension
- Vocabulary instruction and resources that pair with Raz-Plus texts
- Engaging texts organized by topic and theme for building background knowledge
- Playful student portal with high-quality texts for independent reading
- Language resources to practice syntax and grammar
- Text embedded questions to support making inferences and connections in text
- Metacognition strategies and resources for supporting readers in "thinking about thinking"

Save time searching for resources.

Raz-Plus ensures educators have everything they need to support all learners on their path to becoming skilled, confident readers.

VERSATILE

- Complete access to literacy resources and lesson plans for all grade levels
- Adaptable for whole class, small group, classroom centers, and independent practice
- Engaging independent practice library with K-5 decodable books and topic-based texts for building knowledge

PRACTICAL

- Easy-to-use digital solution with embedded professional learning
- Comprehensive library of resources and tools for K-5 classrooms
- Connected to your core literacy program—simply search and filter to extend and enhance instruction
- Engaging printable and projectable library of student texts

RESEARCH-BASED

- Aligned to the latest research on cognitive reading science
- Foundational skills scope and sequence
- Instructional supports for growth in each Reading Rope strand
