

Multiple Cambium Learning Group Products Win BESSIE Award

DALLAS, TX – May 16, 2014 – Five products from [Cambium Learning® Group](#) (NASDAQ: [ABCD](#)) were recently named winners in the 20th Annual Best Educational Software Awards (BESSIES), presented by ComputED Gazette. ExploreLearning® Reflex® by ExploreLearning won in the Upper Elementary category for Math Fluency Website. In the Multi-Level category, Kurzweil 3000®-firefly® by Kurzweil Educational Systems® won for Literary Skills; Raz–Kids and Science A–Z, both by [Learning A–Z](#), won for Reading Resource Website and Science Resource Website, respectively; and ExploreLearning Gizmos® by ExploreLearning won for Math & Science Online Simulations.

The BESSIE Awards recognize inventive and content-rich programs and websites that provide teachers and parents with the technology to promote educational excellence. Winners are chosen from submissions by publishers worldwide.

“As an organization entirely focused on helping students achieve their potential, we are driven to publish products that assist teachers in their efforts to create successful students,” said John Campbell, CEO of Cambium Learning Group. “We are honored that such a prestigious online publication has recognized our products, reinforcing our mission.” The Cambium Learning Group products named as Distinguished Achievement Award and Golden Lamp Award 2014 finalists are:

From ExploreLearning

- [Gizmos](#) is the world’s largest library of online simulations helping students in grades 3–12 develop deep conceptual understanding in math and science.
- [Reflex](#) is a revolutionary game-based system for developing instant, effortless recall of math facts.

From Kurzweil Educational Systems

- [Kurzweil 3000-firefly](#) is literacy software that enables struggling students, including those with learning differences such as dyslexia and English language learners, to learn from the same content as their peers and meet rigorous standards such as the Common Core State Standards. Anchored in the principles of Universal Design for Learning, the literacy software provides a multisensory approach for supporting the complex tasks of developing fluency, vocabulary, comprehension, writing, and study skills.

From Learning A–Z

- [Raz–Kids](#) lets students listen to, read, and record themselves reading literary and informational eBooks — anytime, anywhere; corresponding eQuizzes assess comprehension, and online running records help teachers assess each student.
- [Science A–Z](#) offers printable and projectable materials to teach comprehensive science units within Life Science, Earth Science, Physical Science, and Process Science.
