

Do your **teachers** have all the resources they need for their Science of Reading-aligned instruction?

This checklist is designed to help you evaluate whether your current literacy solutions are meeting instructional goals, supporting teachers, and driving student outcomes — and to identify areas where Raz-Plus® can help bridge gaps while extending and enhancing your core literacy program.

INSTRUCTIONAL SUPPORT AND ALIGNMENT

Our literacy solutions align with the most current research and essential standards

Teachers have access to ready-to-use instructional materials

Resources support whole-class instruction, small groups, classroom centers, and independent practice

Our tools save teachers time and support consistent instructional practices

DIFFERENTIATION AND STUDENT ENGAGEMENT

Students have access to a wide range of decodable and high-interest texts

Explicit, systematic foundational skills support is available when needed

Tools support independent practice and daily classroom routines

Resources engage students and address a range of literacy skills

Multilingual learners are supported with language-building resources

ASSESSMENT AND PROGRESS MONITORING

Assessment tools are built into our literacy solutions

Student progress can be tracked over time

Data and reports help inform instructional decisions

Teachers can use data to group students and target instruction

ACCESSIBILITY AND IMPLEMENTATION

- Literacy solutions are easy for teachers to implement
- Resources are accessible across devices and learning environments
- Professional guidance or learning supports effective use
- Our literacy approach feels sustainable long term

REFLECTION QUESTIONS

Consider the areas you did not check with these guiding questions:

- How can we strengthen our current literacy approach?
- Which areas create the most challenges for teachers or leaders?
- Where do we see inconsistency across classrooms or grade levels?

CONSIDER RAZ-PLUS

If this reflection surfaced opportunities for growth, we'd love to show you how Raz-Plus is the all-in-one K-5 supplemental literacy solution designed to help schools and districts:

- **Streamline K-5 literacy support** with one research-aligned solution that emphasizes foundational skills and reading comprehension equally.
- **Support diverse learners at scale** through built-in differentiation, high-interest texts, and resources that fit alongside any core curriculum.
- **Strengthen instructional alignment** and visibility with consistent resources, assessments, and reporting that support data-informed decisions.

"[Teachers] are using [Raz-Plus] daily during their literacy block, during their independent work time, or if they're pulling for a small group, or during some of our intervention time, and they just praised and praised the comprehension questions."

Dr. Erin Anderson, Assistant Superintendent, Kannapolis City Schools, NC
