

Note Catcher

Make Instructional Decisions Using Raz-Plus Data Learning A-Z

Session Objectives:

- Review and analyze student data in the Reports and In Basket areas of Student Management
- Create classroom routines for student reading with Raz-Plus
- Develop a strategic plan to utilize student data to inform instruction

Notes:

What instructional routines will I incorporate to ensure robust student data?

For successful implementation:

What data will I monitor in the Skills and Assignments reports?

What ways can I add digital tools to my instruction and student assignments?

How can I leverage the recording tool to capture student reading behaviors?

Logistics:

When will I review student data in the Skills and Assignments reports?

How often?
